Course Topic: THINKING: CUNNING KNOW & INFO

Restricted course. Approval required. Contact department.

Doing thinking: Expertise, cunning knowledge, and representation of information - many of modern notions of information retrieval are founded on a privileged place for words and logical operations, as is much of modern thinking. However, there is another field of understanding with an equally deep history - what the ancient Greeks call Metis, Information Science? We will read Hunting and Gathering on the Information Savanna; Dreyfus's What Computers Still Can't Do; Van Bebber's dissertation on Lawyers and Other Professionals; Cunning Intelligence in Greek Culture and Society by Vernant and Detienne. We will develop a model and co-author a proposal for a piece on photography and philosophy.

Theory development: Focuses on the structural components and research processes related to the origination, construction, and evolution of theory in information science and related social science disciplines.

Grant writing and scholarly publication: This course is focused on the graduate student as an early career scholar and teaches the processes and practices of successful grant and research scholarship. This course has two major focuses: A) seeking initial funding for scholarly research, and B) success in early career scholarship and publishing. This course assists graduate scholars to secure funding and begin a productive scholarly research agenda.
