Course Topic: INTRODUCTION TO PODCASTING

This class will introduce you to the fundamentals of producing a podcast. You will use journalism skills to develop, write, script, and produce a podcast that will air on ntdailyradio.com. You will also learn audio recording and editing techniques as well different types of podcasting formats.

Course Topic: DATA REPORTING & VISUALIZATION

This is an internet course. Course enrollment is restricted and non-Texas resident students residing outside of the state are not eligible to enroll in this section. Contact the department for enrollment assistance in an appropriate section of the course if applicable.

Description: Course is an introduction to the communication of facts and data by means of charts, graphs, maps, and diagrams. Students will learn the basics of cleaning "dirty" data, how to analyze it using several programs and how to take the data trends they find and turn them into a cohesive data story. Students who are writers that want to know how to use data in their storytelling and create dynamic data visualizations should take this course. This is not a coding class, and no previous coding experience is required. Access to a computer with ability to download software onto it is required as we will be using several free programs that will need to be installed.

Course Topic: WEB DESIGN FOR JOURNALISM

This is an internet course. Course enrollment is restricted and non-Texas resident students residing outside of the state are not eligible to enroll in this section. Contact the department for enrollment assistance in an appropriate section of the course if applicable.

This course is an overview of online design and an introduction to coding for designers, with an emphasis on thinking mobile first. We will use a case study approach and evaluate the design and production of web applications for journalism, advertising, and public relations. After the case studies section, students will incorporate best practices for user experience (UX) and plan and produce an interactive design of a web application for digital storytelling (this can be on behalf of a newsworthy topic, for a client or a campaign). Throughout the course, students will work on front-end coding skills and investigate the affordances of various languages and libraries for web design.
