WISE - INFORMATION TECHNOLOGY & TOOLS AND APPLICATIONS-ADV: INFORMATION VISUALIZATION

Wise - Info 5960.081/.085: Information Technology & Tools and Applications-Adv: Information Visualization (3.0 Credit Hours)
Current information professionals are faced with an overwhelming amount of information every day. The information is typically unstructured, abstract, large-scale, and needs a more efficient and intuitive way to represent the relationships, reveal the patterns, and/or discover potential opportunities. Information visualization has thus recently gained increasing attention and begun to be widely applied to scientific, engineering, and social disciplines to help people understand and present their information better. According to Gershon et al. (1998), visualization can provide "an interface between two powerful information processing systems - human mind and the modern computer."
This course focuses on the state of the art in the field of information visualization. Topics include:
1. The background of information visualization;
2. Perceptual and design principles of information visualization;
3. Data analysis methods and hands-on applications of visualization techniques;
4. Interaction and interface design issues; and
5. Exciting emerging trends applied to library and information science fields such as social visualization and visual analytics.

The ultimate goal of this course is to provide technical and non-technical students with an alternative powerful tool to process information in the specific domain of their own interests.
