### 2013-2014 Texas Common Course Numbering System Transfer Guide

The bachelor's degree, emphasizing general educational preparation, represents a first step in preparing students for careers as information professionals. By combining a major in information science with an area of special interest in the context of new information technologies, students may be qualified for a variety of positions in information centers, bibliographic utilities and networks, information industry companies, and specialized publishing, abstracting and indexing services.

Students intent upon careers as information professionals should be prepared to undertake an additional year of study to earn the master's degree. It is the master's degree that is recognized as the basic professional degree and that is normally required for professional positions and continuing advancement in the field. The master's degree may be completed on a part-time basis, during which students may be employed in paraprofessional or other positions.

Individual academic programs may require courses contained in parts of the University Core Curriculum. Students who wish to take courses that will fulfill both core and major/program requirements simultaneously should check with academic advisors for assistance in selecting core courses.

**Choice of Catalog:** Any student transferring directly from a Texas public community college to UNT shall have the same choice of catalog designating degree requirements as the student would have had if the dates of attendance at the university had been the same as the dates of attendance at the community college.

The College of Information required curriculum and policies are located in the [Undergraduate Catalog 2013-2014](#).
