Bachelor of Applied Sciences: Technical and Professional Development Concentrations

Students must complete 24 hours of Technical and Professional Development consisting of one or two separate multidisciplinary concentrations. Each concentration will consist of a minimum of 12 credit hours that serve to enhance the skills a student has acquired through prior education or are complimentary to the student's career plans.

The concentrations may come from any department at UNT or may consist of technical/professional coursework already completed at a community college (or in the military) as part of an associate's degree.

Bachelor of Applied Sciences: Technical and Professional Foundations

Specific courses from the College of Information, approved by the BAS advisor, that teach students to communicate effectively, gather and synthesize information and apply information and creativity to generate ideas and solve problems.

A minimum 3.0 cumulative grade point average is required for the Technical and Professional Foundations component. Students must earn a C or better in each of the courses to receive credit toward the degree.

Bachelor of Applied Sciences: Area of Specialization

Comprised of courses related to a specific applied STEM occupation, field or subject. This component may include traditional or applied STEM courses completed for an Associate of Applied Science (AAS) degree at a community college.

In addition, technical credit received by active-duty military or veterans may be applied to this degree plan. Other students who have not created an area of specialization through courses taken in a community college or in the military, may create one by selecting a primary STEM area of study in consultation with the appropriate advisors.

Bachelor of Applied Sciences: Electives

For many BAS students who have completed an associate's degree, elective hours consist of additional STEM specific credits that were not applied to the student's Area of Specialization.

In selecting electives, students should exercise caution to ensure they fulfill UNT's requirement of 36 hours of advanced-level course work.

Please note a lower-level course that is determined to be equivalent to a UNT upper-level course does not satisfy the requirements of advanced hours.

Bachelor of Applied Sciences: Additional Information

A total of 60 hours of applied or traditional STEM coursework (may come from major requirements or electives).

Special Notes

Hours Required and General/College Requirements: A minimum of 120 semester hours, of which 36 must be advanced, and fulfillment of degree requirements for the Bachelor of Science degree as specified in the general university requirements section of the UNT catalog and the College of Information requirements.

A minimum grade point average of 2.0 is required on all courses counted toward the major.

UNT Core Curriculum/Transfer of Core Curriculum: UNT complies with the mandate of the Texas Legislature regarding [Core Requirements](#) for state-assisted institutions. Students who successfully complete the common core curriculum (in whole or in part) at a Texas state-assisted institution of higher education are eligible to transfer as "core complete" for those categories in the UNT University Core Curriculum.

Individual academic programs may require courses contained in parts of the University Core Curriculum. Students who wish to take courses that will fulfill both core and major/program requirements simultaneously should check with academic advisors for assistance in selecting core courses.

Choice of Catalog: Any student transferring directly from a Texas public community college to UNT shall have the same choice of catalog designating degree requirements as the student would have had if the dates of attendance at the university had been the same as the dates of attendance at the community college.

The College of Information required curriculum and policies are located in the [undergraduate catalog](#) under the corresponding catalog year.
